The Landscape Architecture Alumni Connection at UCLA Extension invites you to join us for a

Presentation and Tour of Elmer Avenue Paseo and Green Street

Elmer Avenue Retrofit Project is comprised of Elmer Ave and Elmer Paseo. Elmer Avenue, LA's first "Complete Street" and Elmer Paseo, a new walkable alleyway demonstrate the latest design techniques for managing stormwater. They solve severe flooding problems with infiltration galleries, swales, native plantings and rain barrels.

Join us for a presentation of the Council for Watershed Health's role in bringing together, managing the various stakeholders and collaborators for both projects. Our speaker will describe how these two projects work together to form the Elmer Ave Neighborhood Retrofit Project. Following the discussion will be an in-depth tour of this breakthrough project.

Saturday, March 7, 2015 - 9:30 am - 1:30 pm
Sun Valley Library

7935 Vineland Avenue, Sun Valley, CA 91352
